

Steps to Activate a Plugzio Device

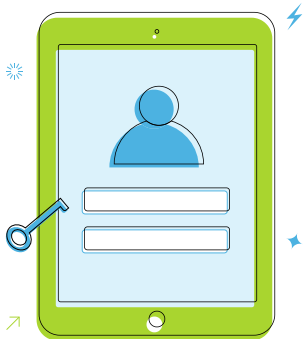

Register as a New User

Go to <https://my.plugz.io/> & click "Register New Account". Alternatively, scan the QR code on the device so you can be redirected to the same page. This step helps verify that you are authorized to use the specific device.

Confirm your Email

Check your email to verify your account using the provided link.

Enter the Device ID

Repeat Step 1 and, this time, log into the user dashboard with your email address and password.

On the main page, enter the 5-digit "Device ID" as shown at the front of the Plugzio device and click "Activate".

For users who have already finished set up: You will then agree to the rate the management has set up for your usage and start the charging session.

For the First Activation Only

The dashboard wizard will walk you through the steps to create and top up your virtual wallet on your first activation before starting a session.
